# Our Mining Capabilities Include;

**Exploration &  
Geological  
Surveys**

**Mine  
Planning &  
Development**

 **Operational  
Support &  
Workforce  
Deployment**

 **Environmental  
& Community  
Impact  
Advisory**

 **Procurement  
& Project  
Management**

# Exploration & Geological Surveys

We conduct comprehensive mineral exploration programs, including geological mapping, geochemical sampling, geophysical surveys, and core drilling. Our expert team uses cutting-edge tools and data analytics to evaluate mineral deposits and assess commercial viability laying the foundation for informed decision-making and successful project planning.

# Mine Planning & Development

Pathmark offers full-spectrum mine development services, from conceptual design to construction and operation planning. We develop optimized mine layouts, access roads, pit designs, ventilation plans, and tailings management systems. Our team ensures compliance with safety and environmental standards while maximizing operational efficiency and resource recovery.

# Procurement & Project Management

We manage the sourcing and delivery of mining equipment, construction materials, and support services. Our procurement solutions focus on cost efficiency, quality assurance, and timely delivery. From feasibility through execution, we coordinate contractors, manage timelines, monitor budgets, and ensure the successful execution of mining infrastructure and production projects.

# Environmental & Community Impact Advisory

Pathmark integrates sustainability into mining operations by conducting Environmental and Social Impact Assessments (ESIA), community engagement, and regulatory compliance advisory. We help clients develop Environmental Management Plans (EMP) and community benefit schemes to maintain strong relationships with host communities and regulators.

# Operational Support & Workforce Deployment

We provide skilled manpower and technical support to enhance day-to-day mining operations. Our services include equipment operators, field engineers, safety officers, maintenance personnel, and logistics coordinators. We also offer remote site support, workforce training, and productivity optimization to ensure smooth, compliant, and safe operations.

# Minerals We Support:

**Gold** <

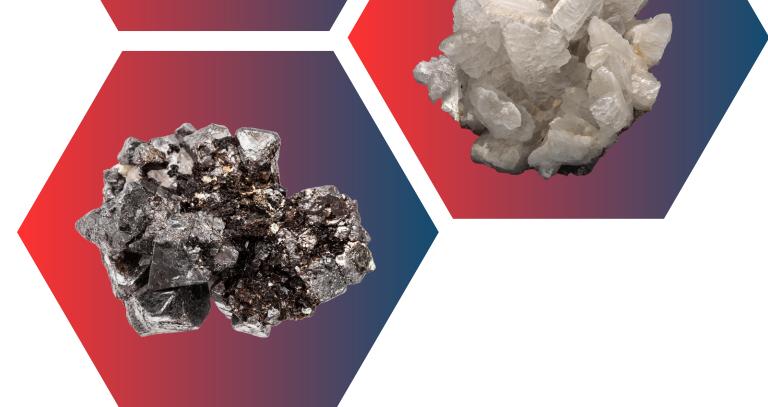

**Quartz** <

**Coal** <

**Iron Ore** <

> **Lithium**

> **Limestone**

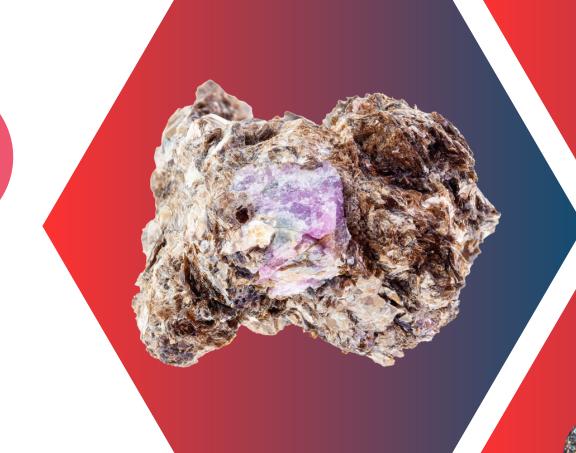

> **Gypsum**

# Minerals We Support:

**Quarrying**

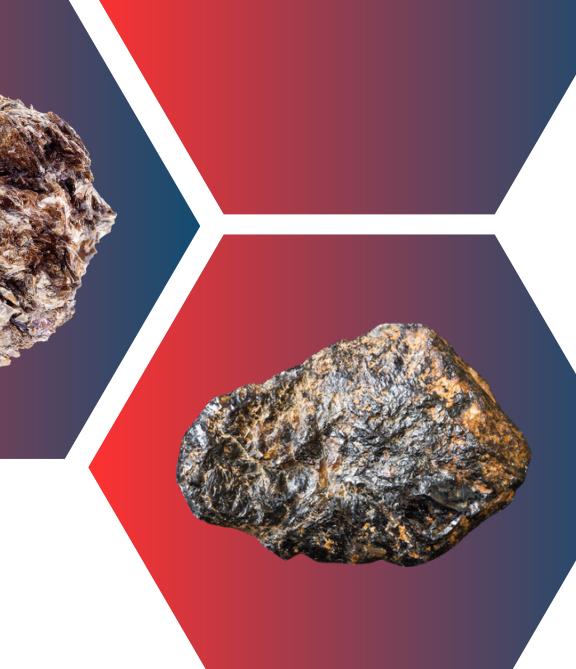

**Feldspar**

**Industrial  
Minerals**

**Tin**

# Why Choose Pathmarkadvisory?

## Cross-sector expertise from experienced professionals.

Leverage deep industry knowledge across sectors for informed solutions.

## Proven track record of delivering measurable value.

Every strategy is tailored—no one-size-fits-all approach.

## Commitment to client success and sustainable growth.

We don't just promise results—we deliver and quantify them.

## Compliance with National and International Industry Standards.

We uphold the highest standards of ethics, quality, and compliance.

# Our Portfolio

“From exploration to execution,  
we deliver mining services that  
power industries and respect  
the environment.”

# Our Portfolio

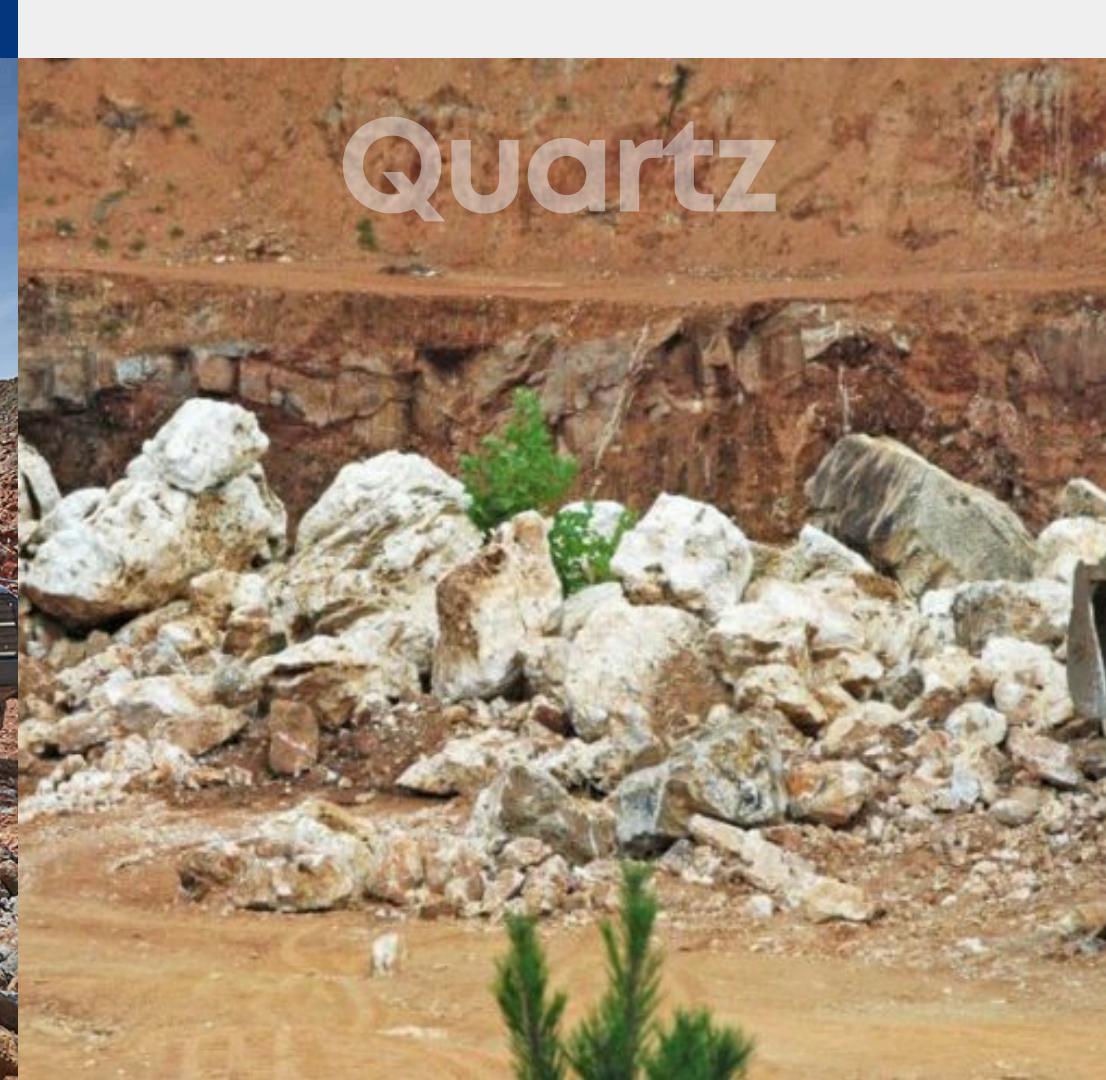

“From exploration to execution, we deliver mining services that power industries and respect the environment.”

Gold
